### National Ford/Sub Council

Your Bargaining Team and I just returned from National Ford and Sub Council meetings where I had the opportunity to discuss the need for Ford to change its global footprint and place all the 4 cylinder work in the U.S. that is currently being produced in Spain, America purchased 650,000 of these engines, I made it clear that we should produce the engines that we buy and let them know that Cleveland is open for business. Ford is receptive to a change in their strategy and it currently is being discussed. There has been a lot of rumors and discussions on the future product mix of our Site, as a Bargaining Team we will do everything we can to make sure that Cleveland Engine will be full to capacity and we are looking beyond that.
